

I am worried about sending my child back to school!

This is understandable. There is a lot of false and misleading information out there. Please try to ignore the social media hype and press agendas. Here is what our children have said this week:

Everyone feels safe at school.

I like seeing my friends again.

I like playing on the space hoppers with my friends in our Bubble!

I really like seeing my friends. We played Iron Man.

I've played superheroes. My sister won't play it with me at home, but my friend will in school.

I played with the water and my friends again. I even have a special red carpet spot.

I've felt safe being back at school because of my teachers.

I've loved being back at school. We are well spread out and there are lots of opportunities to wash our hands.

School is fun. I feel good and safe because I can still see my friends.

I thought it would be different and it was. Good different though.

You should come back to school because it's AMAZING! We have been doing fun learning activities.

I like being back at school because I can see my friends and teachers. It feels good to be back.

I feel better being at school than home because school helps me with my work and preparing for high school.

Come to school! It is different and you need time away from home.

Most of the learning is revisiting what we have struggled on so that means we can build up and be confident.

Everything is going well. We are washing our hands a lot and are in small groups.

Every school is different! The only way to know what it will be like in our school for your child is to ask us!
